- College-level Math
- Test Preparation (TOEFL)

Caribbean Medical University Provides Incomparable Learning Opportunities

Headquartered in Curacao's capital of Willemstad – with administrative offices in Chicago, IL. – CMU enrolls classes each January, May and September. The university offers two main courses of study: a premedical program and a Doctor of Medicine (MD) program. The premedical program lasts three semesters at the Curacao campus and is for students who have completed less than 90 college credit hours. Coursework includes organic chemistry, physics, biology, English and calculus. The MD program is for those who have completed at least 90 college credits, including the science prerequisites. It's a 10-semester course that's divided into three components. Semesters 1-4 cover basic sciences and are held at the Curacao campus. Semester 5 prepares students for the United States Medical Licensing Examination. After passing the USMLE, students advance to Semesters 6-10, which consist of clinical clerkships at hospitals and medical centers in the United States.

The mission of CMU is to educate medical students in accordance with the highest professional standards, to prepare clinicians to practice patient centered medicine of the highest standard, and to identify and answer fundamental questions in the mechanisms, prevention and treatment of disease, in health care delivery and in the basic sciences. CMU has implemented an entirely new model of medical education that enhances the university's ability to act as a transformational agent in the health care field. CMU's unique approach to medical education embraces cross-disciplinary teaching modalities, breakthrough technologies, and innovative ways to advance training in both basic science and clinical skills throughout the medical school curriculum. In addition, CMU deepens students' understanding of academic medicine by stressing Higher Order Thinking Skills (knowledge, comprehension, application, analysis, synthesis and evaluation) tested in USMLE Step I rather than simple memorization of facts to better prepare tomorrow's doctors and make an impact on their career. Students graduate prepared for the next level of medical training.

For more information about CMU, visit www.cmumed.org or call **888-877-4268**

International Admissions

USJ represents Catholic education at its highest, university level.

Our university inherits the longstanding tradition of Catholic humanistic education in Macau, which extended beyond the confines of China to all East and South-East Asia, and the islands of Oceania.

Using English as a medium and teaching Chinese and Portuguese as languages to be known by all, USJ sets the stage for its international staff and multinational student-body. In our academy, East and West carry on the centuries-old dialogue through which Macau acquired its unique identity.

Close links to the Catholic University of Portugal and to Catholic universities in Angola, Brazil and Mozambique, set us in the privileged position of being able to contribute to Macau's present calling as a bridge between Portuguese-speaking countries.

Our study programmes provide students with the essentials of their major field of knowledge, but include modules to broaden their outlook on the world and stimulate creative thinking. We care for the competence of our graduates in their future professions, but our privilege and mission is to introduce them to a university environment where they learn to analyze, question, evaluate and decide in the context of consciously assimilated values and culture.

We are committed to improving the quality of our academic life in the light of suggestions from staff, students and society, to better serve higher education in China and Macau.

Brief information about USJ and its programmes

History

The University of Saint Joseph (USJ) is a local university, established in 1996 by the Macao Diocese and the Catholic University of Portugal (UCP).

Programmes

Our programmes are accredited by the Macao government and have proven to have good recognition. This recognition is reflected by the employment rate and feedback received from the job market, which has been very positive. Moreover, several of our students have been accepted for postgraduate studies at prestigious universities internationally and won local and international prizes for their achievements.

The main features of our undergraduate programmes are the inclusion of a set of core modules, focused on developing student's general knowledge as well as on instilling a critical and ethical conscience and approach to their subjects of study.

We currently offer the following Bachelor programmes:

- Architecture
- Business Administration
- Christian Studies
- Communication and Media
- Design
- Education
- Fashion Design
- Philosophy
- Portuguese-Chinese Studies (Language & Culture)
- Psychology
- Social Work

Besides, we offer also three Pre-University programmes, all with a 1-year duration, namely:

- Pre-University (offered in English)
- Intensive Portuguese Course (offered in Portuguese)
- Foundation in Theology (offered in English)

Features

The multicultural experience provided is also a striking feature of USJ. The medium of instruction for the vast majority of our programmes is English and nearly one-fourth of our student body is international, hailing from over 50 countries around the World. USJ provides ample support systems for its students, including intensive English summer courses for new students, tutorials, English support tutorials, pastoral and counselling services, a "buddy" system and a small-class size policy enabling dedicated attention and support to each student.

New Campus

The construction of our new campus in Ilha Verde is nearing completion and we expect to welcome our students in this coming academic year 2017/2018 in the new campus. Master and Doctoral programmes, as well as Lifelong Learning programmes will continue to be offered at NAPE1 or the Seminary.

MONROE COLLEGE

If you want to go to one of the best colleges
in New York,
you'll just have to pay ...less

How do you measure the value of a college education? There is a lot being written today about the return on investment of a college degree. Many in the academic world will argue that you cannot measure an education in dollars and cents.

At Monroe College, yes, we turn out graduates who have the ability to think critically and the desire to act to improve their communities. But Monroe College delivers value. At Monroe we never lose sight of the fact that your college education must enable you to succeed in the real world. And to accomplish that, first and foremost, we must give you the tools, the support, and the flexibility to succeed at college – to stay in school and earn a degree. That is an area where Monroe College excels. Students at Monroe College stay to earn their degrees. Monroe's six-year graduation rate is over sixty percent, more than double the graduation rates at other

colleges in this area. Over 14,000 students have earned degrees from Monroe College over the last five years.

Monroe offers classes at two campuses, in the Bronx and in New Rochelle, where new beautiful and technologically-advanced student residences have been completed on Main Street. In addition, Monroe provides a complete roster of classes online in every major – an online program that U.S. News and World Report cited as one of the best in New York State and one of the tops in the country for veterans.

And of critical importance, Monroe College removes, perhaps, the biggest hurdles to achieving a degree...expense. Monroe College is the "the Most Affordable Private College in New York State" according to U.S. News and World Report. And annually millions of dollars in grants, scholarships and financial aid are

available to Monroe students.

Monroe is a college like no other in the New York area, more cosmopolitan, more focused on success and more affordable. Monroe draws students from all over the world and across the United States – young men and women from six continents and 23 states are working towards their degrees at Monroe. If you or your child are beginning the college search process, you would be well served to include this unique institution of higher learning among your "must-see" list. Ask an admissions counselor at Monroe College to give you an in-depth portrait. Ask to tour the campuses – you can schedule your tour on our website. Come and meet the Monroe community – the administrators, the faculty and the students who make up the Monroe College family.

International Admissions

William
Angliss
Institute

Specialist centre
for foods, tourism,
hospitality & events

The William Angliss Institute (WAI) in partnership with the Colombo Academy of Hospitality Management (CAHM) is Sri Lanka's largest private hospitality school. Based in the SLIIT campus in Malabe, we are a dedicated centre for Foods, Tourism, Hospitality & Events. William Angliss has a proud history of over 75 years, and in the Melbourne campus there are over 21,500 local clients and students, and 1,300 international students from over 45 countries with more than 100,000 graduates worldwide.

Our teachers are from the Hospitality Industry, both local and international. Their expertise varies from Hospitality Management, Bar Operations, Administration, Finance etc. The Academy is visited by several guest lecturers throughout the year from the William Angliss institute. Our training facilities include a well-equipped training kitchen, including a functioning restaurant. Our courses are designed with industry needs in mind, and work to ensure that our graduates are 'Career Ready'.

International Students

As the premium and the largest institute in Sri Lanka we provide an internationally recognized Australian curriculum related to Foods, Tourism, Hospitality & Events, and have experience in hosting students from Oman, Kenya, India and Maldives.

We provide a wide range of essential services that include airport shuttle pickup, off-campus housing assistance and opportunities to experience and enjoy the many clubs, organizations and activities planned for international students.

International Admissions

Advanced Diploma of Hospitality Programme in Sri Lanka with a Degree Pathway in Australia

Certificate III in Hospitality (SIT30713) Semester 1 (6 months)

This qualification combines entry level practical skills and relevant theoretical knowledge in customer service, workplace hygiene, coaching, introduction to food and beverage service and coffee.

Certificate IV in Hospitality (SIT40313) Semester 2 (6 months)

Relevant theoretical knowledge in areas such as: customer relations in hospitality, health, safety, security, and food knowledge. Your studies continue with an emphasis on supervision with a specific focus on: introductory finance, safety and security and stock control. Continue your studies to complete the Diploma stage.

Diploma of Hospitality (SIT50313) Semester 3 (6 months)

This stage builds on the certificate IV in Hospitality and begins to explore substantial depth, theoretical concepts relating to: business operations, budgeting, workplace diversity, legal knowledge, rostering and quality customer service.

Advanced Diploma of Hospitality (SIT60313) Semester 4 (6 months)

The final stage involves consolidating your skills and managing finances, property management, implementing marketing strategies, events and function coordination and Human Resources.

Pathway Degree

Once a student has successfully completed the Advanced Diploma of Hospitality they will then be eligible to partake in the bachelors programme, conducted in Australia by the William Angliss Institute.

Facilities

Our Academy provides students with the best facilities in order for them to carry out their practical sessions in training in Hospitality, Tourism, Foods and Events. We ensure that the students get a hands-on experience in order to meet the industry requirements. Our first-class facilities and expert mentoring will provide students with the confidence and experience to be a leader in their chosen field.

Facilities include innovative, live and vivacious classrooms, a fully equipped training kitchen to carry out all culinary activities and an operational restaurant where students are able to practice their F & B skills, serve guests during events and have the ability to experience day to day challenges of food service and event management.

What is on Campus?

- Sri Lanka's largest training kitchen
- Coffee Academy and Food & Beverage training facility
- Demonstration concierge and guest relations training centre
- Student recreation rooms and team rooms
- Prayer Room
- First Aid Facilities
- Medical facility and doctor on site
- Student counseling service on site
- Student cafe
- Library and bookshop
- Fully equipped gymnasium and sports facilities, at SLIIT

- C.A.R.L. - your tool for Clinical Rotations eases communications with your Preceptor, the Clinical Department and you.

WHY DO YOU NEED A USMLE PREPARATION COURSE?

Overview of all your studies | Teaches test taking skills | Taught live in Atlanta GA |

No more than 25 students per class | Individual study time with professors |

Passing USMLE is an essential step toward residency. | Assistance with your residency application |

C.A.R.L.

The Clinical Activity Rotation Log (C.A.R.L.) is a cutting edge technology tool for your Clinical Education providing you the assistance you need to excel in your Residency applications.

CARL captures your patient, rotation, class and procedure data in real time which is meaningful to Residency Directors. The software is connected to the internet which allows you and your Preceptors direct communication with your Medical School's Clinical Dean. You will not receive any surprises at the end of your rotation. Your feedback from the school and your Preceptor will be streamlined into a continuous communication link directly to you.

CARL maintains an unbroken timeline and corresponding chain of custody of critical Match related documentation.

AMERICAN UNIVERSITY OF INTEGRATIVE SCIENCES ST MAARTEN SCHOOL OF MEDICINE

The American University of Integrative Sciences, St. Maarten School of Medicine (AUIS) offers a degree in Pre-Medical Sciences and a four year MD program. AUIS is recognized internationally for providing a solid education in Allopathic Medicine which is reinforced with Alternative and Holistic approaches that focus on preventive instead of reactive patient care.

1

Pre-Med: High School students may be accepted directly into our Pre-Med Program without any college credits. The Pre-Med program teaches 90 credit hours of background courses needed to enter the Basic Sciences MD program. The Pre-Med program takes 18 months to complete. This is a much faster route to become an MD than those who go from high school to college then on to medical school.

Basic Sciences: Taught in a 5 term format of 20 months on the island of St. Maarten, the land of turquoise waters. Upon successful completion of the Basic Sciences program, students must pass USMLE Step I to qualify for Clinical Sciences.

2

3

Clinical Sciences: NO WAITING makes it possible to complete all clinical rotations within two years of successful passage of the Step I. Consists of 48 weeks of core and 32 elective clinical rotation weeks. Students practice clinical skills through patient contact which is supervised by a Physician-Preceptor in patient care settings. Upon completion of the 80 required weeks of clinical rotations, the student must complete Step II Clinical Knowledge (CK) and Step II Clinical Skills (CS) examinations in order to qualify for the Doctor of Medicine Degree. AUIS has opportunities for clinical rotations in over 400 locations across the US. Many clerkships are Accreditation Council for Graduate Medical Education (ACGME) listed or affiliated programs.
